

HAUNTED HOUSE

Solve the mystery in a haunted house!

Genre: 3D Action-Adventure

Platform: Unity (PC).

Target audience: Children aged 6-8, English-speaking, beginner-level gamers.

Game idea

Haunted House is a light-hearted 3D action-adventure game where children explore a spooky garden and a haunted mansion filled with playful ghosts, zombies, and witches. Armed with a magic stick, players battle silly enemies, solve environmental puzzles, and collect clues to uncover the big secret behind the haunted house.

Game Overview

Exploration: Move freely through three main areas — the *Garden*, the *Graveyard*, and the *Haunted Mansion*. Each area hides one piece of evidence that reveals the truth behind the mystery.

Combat: Simple and safe — use a *magic stick* to scare away funny enemies (no gore or fear).

Puzzles: Age-appropriate mini challenges, such as activating switches, finding keys, or matching symbols.

Progression: Players unlock new areas as they find clues and learn more about the haunted house's story.

Key Features

- Friendly “spooky” atmosphere — mysterious but never too scary
- Colorful 3D world designed for easy navigation and exploration
- Encourages curiosity, confidence, and light problem-solving
- Three unique enemy types (ghost, zombie, witch), each tied to a themed level
 - Final reveal connects all clues and ends with a positive message about courage and friendship

Design Goals

- Create a first adventure experience that feels magical, not frightening
- Focus on simple controls, clear objectives, and rewarding exploration
- Deliver a story-driven experience that lasts about 45–60 minutes

Development Info

- **Engine:** Unity
- **Art Style:** Stylized low-poly 3D with warm lighting and cartoonish effects
- **Estimated Duration:** 15 op
